All recipients of Energy Boost seed grants are required to submit a final report to ACERC within three months of completion of the funding period.

Reports should be prepared using 11 point Times New Roman font. Final reports consist of the following:

1. A final-report cover sheet with all required signatures and the text of the abstract of your original proposal

2. A two-page, single-spaced narrative describing the project outcomes using the following headings:
   a. Summary: Summarize the results, findings, or conclusions of your project.
   b. Publications list: List all publications, posters, published abstracts, exhibits, or presentations—past, present, or pending—that developed from the award (including those prepared by students or others involved in the project).
   c. External funding: List all external funding sought (funded, not funded, or pending) as a result of your Energy Boost award; give proposal title, sponsor, and amount requested.
      o Awardees will also be asked to update information regarding outcomes by completion of brief annual surveys for up to three years after completion of their seed grant.

NOTE: Remember that a proposal MUST be submitted to an external funding source no later than twelve months from the project start date. Failure to meet this requirement will jeopardize access to further internal funds administered by ACERC.

Please submit your final report to energy@siu.edu, Advanced Coal and Energy Research Center, 405 W. Grand, MC 4623.
